

# Quality Environmental Services

**Personnel:**  
All AST personnel are fully trained for working with hazardous materials in compliance with 29 CFR 1910. Our staff includes Project Managers, Engineers, Site Supervisors, Certified Hazardous Waste Technicians, and Equipment Operators. AST's staff understands environmental regulations and utilizes this knowledge to assist our clients in achieving the most cost-effective solutions.

## Equipment:

AST owns a 6,000 sq. ft. office and shop in Springboro, OH and a 5,000 sq. ft. office and shop in Lexington, KY to maintain sufficient equipment to fulfill our client's needs. This equipment includes air monitoring and safety instruments, computers, sampling tools, air compressors, generators, pumps, pressure washers, light-plants, small drilling units, sampling and decon trailers, heavy construction equipment, large excavators, bulldozers, dump trucks, loaders and backhoes.

## Insurance:

AST maintains full insurance coverage, including General Liability, Automotive, and Pollution Liability (at \$5 million). Varying limits can be obtained on a site-specific basis or coverage can be modified to meet a client's specific requirements.

# AST

Environmental, Inc.

*AST Environmental, Inc. (AST) is a multi-disciplinary environmental remediation and contracting company. AST offers expertise in all aspects of site remediation and management, including project planning, system installation and operation, and performance evaluation. Our managers have over seventy-five years of cumulative environmental contracting, remediation, and general construction experience throughout the United States and overseas. AST can provide highly trained managers, union and non-union labor, remediation equipment and heavy construction equipment over a large geographical area.*

## Environmental & Civil Construction

- Interceptor Trenches
- Containment & Barrier Walls
- Methane Gas Collection Systems
- Landfill Construction & Closures
- Sludge Solidification & Dewatering
- Surface Impoundment Closures
- Water & Wastewater Treatment Plants
- Site Development

## Waste Management & Remediation

- Waste Excavation & Removal
- Drum Removals
- Waste Segregation & Lab Packing
- Storage Tank Removals
- Decommissioning & Demolition
- Soil & Groundwater Treatment Systems
- Industrial Cleaning

## Subsurface Sampling & Injection

- Direct Push (Geoprobe®) Applications
- Installation of Small Diameter Wells
- Hydraulic Fracturing
- Injection Trailers (36 gpm @ 1200 psi)
- Authorized Installer of Trap & Treat® Products
- Injection of Dechlorinating/Reducing, Oxidizing, & Biological Enhancing Agents

## Source Emissions Testing

- Compliance Testing
- Performance Optimization
- Efficiency Determination
- Relative Accuracy Test Audits
- Site Specific Method Development
- Test Methods (EPA, ASTM, NCASI, NIOSH, and SW-846)
